

# Haku-Gold/Silver Recycleglass

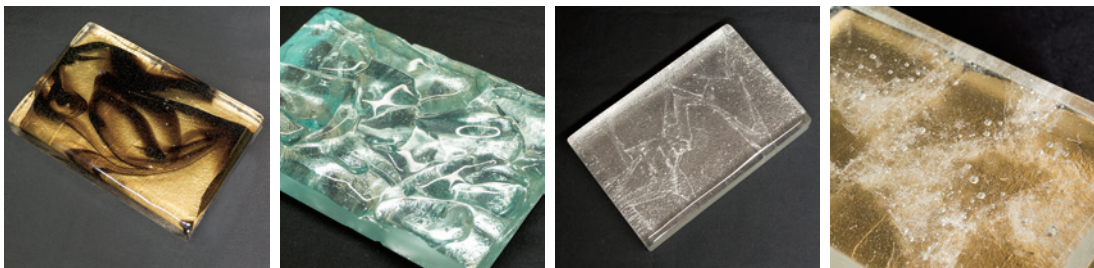

※the color varies with the thickness of glass and PC display.

◆product name : **Haku-Gold / Silver**

◆material : High transparency recycled glass  
gold leaf (gold94.43% silver4.9% copper0.66%) / silver leaf (silver 100%)  
coating process on the surface of the foil.

◆details : we use high transparency recycled glass and put gold or silver foil on the back.  
the foil is processed with coating agent. texture of surface increases the sparkle  
by foil and atmosphere becomes luxury. Also each texture of the surface  
changes the impression and it effectively express the depth.

◆caution : there is a risk that the topcoat peels off by friction and wear.  
the color of the topcoat may change due to aging.

※the characteristics and process of the glass can cause unevenness and bubble shading on the surface.and it depends on the individual difference of material.
